Scope and Content Note

The materials in FOIA 22-16596-F are a selective, not necessarily all-inclusive, body of documents responsive to the topic of the FOIA. Researchers should consult an archivist about related materials.

FOIA 22-16596-F requested all photos and video of Bill Gates.

This FOIA primarily contains photographs of Bill Gates' visits to the White House on March 25, 2009, December 14, 2010, and November 14, 2012; President Obama meeting with energy company executives in the Roosevelt Room on June 10, 2010; President Barack and First Lady Michelle Obama attending the 2010 Annual Meeting of the Clinton Global Initiative (CGI) in New York City, NY, on September 23, 2010; President Obama meeting with members of the Giving Pledge in the State Dining Room on July 18, 2011; President Obama attending the G20 in Cannes, France, on November 3, 2011 and the United Nations Framework Convention on Climate Change in Paris-le Bourget, France on November 30, 2015. This FOIA also contains footage from the White House videographer of the Medal of Freedom Ceremony on November 22, 2016.

System of Arrangement

The materials in FOIA 22-16596-F are a systematic body of documents responsive to the topic of the FOIA. Researchers should consult an archivist about related materials.

Records responsive to this FOIA were found in these collection areas – Obama Presidential Electronic Records and White House Communications Agency The Executive Office of the President (EOP) instance of the Electronic Records Archive (ERA) contains electronic records created or received by Obama administration staff. These records are stored in Search and Access Sets (SAS) that represent their originating computer program, such as Exchange Email or the Worker and Visitor Entry System (WAVES). In addition to records captured from the White House's electronic systems, EOP-ERA also contains records from the home and shared drives used by White House staff.

White House Communications Agency records are processed at the folder/videotape level. While this method maintains folder/videotape integrity, it frequently results in the incidental processing of videotapes that are not wholly responsive to the subject area.
