P6/b(6)

Thx. We'll discuss in the morning.

Subject:

Mr. President--We (the US Geological Survey) have detected a seismic event in North Korea. The South Koreans and the Japanese have also detected and are publicly attributing to a North Korean nuclear test. Neither we nor they have to this point been able to verify and we have no announcement from the North. Our plan is to await an announcement before issuing our statement. We have a conference call among deputies at 11:15.

Will keep you informed.

Tom
