Subject: Kim this is for you!

I was doing some computer searcing last night as I was laying around and I found this. I thought you would enjoy:

Top Ten Reasons for Upgrading to a PC instead of a Mac:

- * 1. You enjoy reading computer manuals
- * 2. Buying parts 'not included' is your idea of being patriotic
- * 3. Blaming it on the PC is a great excuse... for anything
- * 4. Tech support is your idea of telephone dating
- * 5. Your favorite computer game is figuring out where your files are
- * 6. You look forward to today's new virus (or worm, or both)
- * 7. You like listening to telephone support hold-button music
- * 8. Letting the kids play on the Mac next door frees your time (eliminates after-school kid sitters)
- * 9. You think Bill Gates deserves the money
- * 10. You have nothing better to do with all the extra time

The Mac is a very serious thought in my mind right now. :)

Insert movie times and more without leaving Hotmail®. See how.
