Dear President Obama,

Thank you for taking the time to meet with my colleagues and me last week on energy innovation, particularly at such a busy time. I know all of us appreciated the chance to discuss the urgent need for U.S. investment in energy innovation, and we left the discussions optimistic at the prospects of addressing this critical need.

It was particularly helpful to have so many senior administration officials at the meeting. We are eager to work with them to see this opportunity through to success.

Clearly, there is much work to be done to make this vision of American leadership in the invention and deployment of clean and cheap energy come to pass. I look forward to working with you to make the important goal of a clean energy future a reality.

Sincerely,

Bill

P.S. The R+D piece is a critical piece! The current House bill doesn't fund R+D correctly. I also valued discussing the Education work. I am keynoting the AFT convention in early July.
